

Stephen Collins, Assistant Vice President for Jacobs Telecommunications, is a 16-year wireless network design and deployment veteran who has supported multiple 3G, 4G, and 5G deployments all over the US. Stephen has a record of successfully guiding local and national teams to deliver projects on schedule and under budget. Stephen has developed strong, trusted relationships with customers among all of the large wireless carriers throughout the course of his career.

Stephen guides a team to complete an average of 4,000~ wireless projects per year, generating \$240~ million in annual revenue for Jacobs. His group specialize in Network Design, Architectural Design, Engineering, Procurement, Compliance, HSE Management, Project Management, Construction Management, Construction, Technical Services and O&M on Telecommunications facilities.

Stephen leverages his market knowledge and expertise in wireless communications to disrupt and adapt how his group do business in the Telecommunications space. The advantages of leveraging the stability of a Fortune 200 corporation, multiple business units and experts within the company, and being flexible and adaptable as an organization, have given Jacobs a competitive edge in the Telecommunications space where they continue to expand and grow their customer and service base.
